## CAREER GOAL :

My dream is to become an expert in various Omics data analysis. As genomic sequencing technologies are developing faster than ever, I would contribute to develop about sequencing data analysis technology. Also, I want to help to improve therapeutic methods and diagnostic methods about many incurable diseases by approaching bioinformatics. Recently, I would like to develop innovative AI drug discovery method by applying the aforementioned technologies to deep learning.

---

## RESEARCH INTEREST :

1. Cancer genomics
  2. Bioinformatics
  3. Precision medicines
  4. Deep learning
- 

## MILITARY SERVICE :

2017.03 ~ 2018.12 : Completed military service at the ROKA

---

## EDUCATION :

B.S :

Department of Bioscience, Biotechnology, Kyungpook National University (2016.03 - 2022.02)

M.S :

Biomedical convergence science & technology, School of  
convergence, Kyungpook National University (2022.03 - Present)

---

**LANGUAGE EFFICIENCY :**

TOEIC : 840

---

**RESEARCH EXPERIENCES :**

▶ 2021.07 ~ 2021.08 : Research Intern at Personalized Genomic  
Medicine Research Center, Korea Research Institute of Bioscience  
and Biotechnology(KRIBB), Korea / Summer internship

▶ 2021.09 ~ 2022.02 : Research intern at Computational  
Genomics Lab, Department of Biomedical convergence science &  
technology, Kyungpook National University, Korea / Undergraduate  
Intern

---

**OTHERS ACTIVITIES :**

▶ 2016.03 ~ 2016.12 : Joining volunteer group in Department of  
Natural science, Kyungpook National University

▶ 2021.03 ~ 2021.06 : COVID-19 campus preventer at Kyungpook  
National University

▶ 2021.08 : Academic Excellence Scholarship , Kyungpook National  
University

▶ 2021.09 ~ 2021.12 : Taking a online lecture of K-Genome Online  
Lecture(KGOL) - Easy Genome Analysis for Biomedical engineer

▶ 2022.01 ~ 2022.02 : Mentee of 2022 winter job mentoring program,  
Samsung Bioepis(EPIS Day, J/D : Clinical Project Manager)

---

**Projects :**

▶ Analysis of Various Brain Tumor Transcriptome with Immune  
Expression and Cell Types  
(Sep. 2021 ~ Present)

▶ Single cell RNA sequencing in Gastric Cancer, Kyungpook  
National University Hospital, Korea / Gene expression profiling of  
Gastric cancer single cell RNA sequencing data  
(Mar. 2022 ~ Present)

---

**CERTIFICATIONS :**

Certification of Korean history Level 1

Word processor certification

Computer specialist in spread sheet & Database Level 2

Genetic data analyst level 1 (KGOL)

---

**TOOLS and SKILLS :**

Microsoft excel, Python, Pandas, R, Linux, Bash,

Basics of tensorflow

---

**DECLARATION :**

The information provided above is accurate to the best of my knowledge.
